PROJECTS

E-book library and sharing web app

- Built a full-stack web app that allow users to read, organize and share e-books (pdf, epub, mobi, kindle files) from any device.

Torrent video streaming application

- Built a web app where user can search movies then save the movie on cloud storage and watch from any device. Implemented using Next.js for node.js based server and SSR with React.js.

Retrainable Bangla voice assistant

- Developed a voice assistant using NLP that can be trained simply by giving voice commands in Bangla to answer any custom question. Application will retrain itself each time user teach it what to say for a specific question.

EXPERTISE

- Writing reusable and performance efficient JavaScript and TypeScript Code.
- Implementing React component from Figma, PSD, SVG UI designs.
- REST API development.
- JSON Web Token implementation.
- Auth0 hooks and rules implementation.
- Experience of working with WebSocket.
- Hands on experience with Oracle Cloud and AWS Compute instance.
- Good understanding of AWS S3 bucket and S3 REST API.
- Experienced in deploying full stack web application in Linux environment to Oracle Cloud Infrastructure.

SUMMARY

Recent computer science graduate with a passion for developing scalable web applications and expertise in MERN stack. I've built several web applications from the ground-up using React, Node, Next.js, MongoDB and MySQL. Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack Developer.
